

STONY PLAIN SUN.

VOLUME 3.

STONY PLAIN, ALBERTA, THURSDAY, AUG. 24, 1922.

WHOLE NUMBER 108.

One Dollar Saved Is As Good As Four Dollars Earned.

Commencing Friday, for One Week, you can save Money on the following:
White Cups and Saucers at 20c each, \$2.35 doz.
Cream and Gold Cups and Saucers at 25c each, \$2.95 dozen.
Empty Steel Barrels with faucet, \$4.75 & \$5.75.

Bolt Assortments.

35 Assorted Carriage Bolts 1x1 to 1x6, \$1.
30 Assorted Machine Bolts 5-6x1 to 1x5, \$1.

Get Our Prices on Threshers' Supplies and Oils.

C. W. ROSSELL.

Grade 8 Graduates.

Following are the successful pupils in Grade 8 (all the class):
Martha Baron
Margaret Paul
Gladys Davis
Cecil Umbach
Clarence James Henry Lory
Miss Lalonde,
Tetcher.

On the Side.

Well, it seems now as if we are not to have a Wheat Board after all, just when the farmers were beginning to congratulate themselves that this scheme would be effected whereby they would be able to sell their product at a price something near its real value. That everything possible was done by the Government to put on the statute books this panacea for all the farmers' financial ills goes without saying, as, for instance, didn't we have a five day special session of the Legislature, for which those who attended received only the paltry dole of \$250.00 for passing on a bill to help bring the Wheat Board into existence? The rumor is current now that some members of the Legislature are so chagrined at finding that their best efforts went amiss, that they intend refunding the extra pay, and the following is a list of those Assemblymen who will send back that \$250.00 to the Provincial Treasurer:

A further list of these Assemblymen will be printed in our next issue, (if space permits).

Weekly News Bulletin.

Preparations are now being made by the provincial treasury department for a new debenture issue some time this autumn. The province has \$5,000,000 of 4 per cent. sterling debentures maturing November 1, and a refunding issue is to be put out for the purpose of meeting this obligation when it falls due. No definite decision has yet been reached as to the date and terms of the issue, but it is expected that it will be placed on the market in the latter part of September or early in October.

Something like fifteen hundred licenses have been issued to restaurants, soft-drink bars, lunch room &c. by the license branch of the Attorney General's Department up to the present time, but according to reports of the inspectors of the department there are still a very considerable number who have failed for one reason or another to take out their license. Officials think there may still be some misunderstanding as to the requirements of the Act.

Prosecutions recently undertaken by the theaters and amusements tax branch of the provincial government resulted in conviction of Victor Hillmer, of Boundary Creek, of operating a public hall without a license, for which he was fined \$10 and costs; and also for failing to collect amusement tax, for which he was fined \$25 and costs.

The Department of Agriculture recently purchased the young shorthorn Bull "Princeton Benefactor" from the Prince of Wales ranch at Pekisko. This bull will head the shorthorn herd at Olds. The bull is the first calf to be bred on the Prince of Wales ranch. He is a beautiful dark roan bull, 13 months of age, and is from the celebrated Cruikshank-Crooks family, founded by Angus Cruikshank of Aberdeenshire, Scotland.

Professor A. A. Dowell, who has been in charge of the animal husbandry branch of the college of agriculture, has resigned from that position to join the agricultural faculty at the University of Minnesota. Dean Hawes is now engaged in selecting Prof. Dowell's successor.

LOCAL NEWS.

Miss Lalonde has written from Seattle, intimating her intention of retiring from the teaching staff at the local school.

Her many friends will be pleased to hear that Mrs. Theo Graden, who had been in an Edmonton hospital for two weeks undergoing treatment, is now recuperating at the home of a friend in the City.

Mr. A. Mohr returned to Mundare on Monday.

Miss White, of Heatherdown, returned home on Friday from her visit East.

Mr. Geo Meisner spent Sunday in the city.

The Ingram Grain Door Factory is now working to the limit with a full staff.

Game licenses may be procured at The Sun Office.

The recent heavy rains have had the effect of throwing a very good crop of mushrooms.

The dance given Friday last by the Meares Cleator was all that could be wished, and drew a much larger patronage than if received.

It is proposed now to station a man on the Highway west of the Fifth, to keep the crowds moving which insist on stopping to admire the new fence erected on the north side of the town.

Mr. W. H. Schweitzer, the popular broadcaster, is stopping overnight at the hotel, on Saturday, August 26. Mr. Schweitzer intends moving to the other side of the line.

Mr. Judd, inspector of elevators, is expected here this week, to look over the new Federal Elevator building.

Mr. Geo Murray, grain door inspector, has been attached to the Ingram factory.

The Vancouver Express was over 3 hours late Monday morning.

The local school opens on Monday next, the 28th.

At the Sedgewick Fair last week, Mr. Wm. Gilbert secured 6 prizes for his Holstein exhibits; 6 prizes out of 16 for his Berkshires; and 8 out of 9 prizes for his Tamworths.

Mr. Sid Sheppard left this week for Vancouver, with the exhibit of livestock from Sunnybrook Farm. Mr. Gilbert expects this exhibit will have the same phenomenal success as it had last year.

The local men who have been working at Lacey and Claymore, are moving this week to Round Hill.

The Futility Of Strikes

The Great War taught the world the futility of war. Those nations which started and lost the war are prostrate, while those which in honor were forced to engage in the struggle and who won the war are doomed to struggle along under burdens of debt and obligations which it will require several generations to pay. And, after all, what did the Great War really achieve for the benefit of mankind? Nothing, unless it be that at long last the human family has learned the futility of war, and the absurdity of trying to maintain peace by the making of feverish and gigantic preparations for war. The creation of the League of Nations, the establishment of an International Court of Justice, and the signing of disarmament treaties, all seem to indicate that the lesson has been learned.

But while statesmen, capitalists, and labor are all agreed that war is a curse and that no effort must be left untried which will prevent a recurrence of the catastrophe which overtook the world in 1914, each and all of these three main groups in the industrial world seem content that the age-long struggle between capital and labor, employer and employee, shall continue to be waged with the crude and obsolete "strike" as the chief weapon. Yet, surely in this presumably enlightened century, as with all the experiences of the past as a guide, the able leaders in the political and industrial life of the world must realize, and do realize, the utter futility of "strikes" as a means of obtaining redress of grievances and the accomplishment of permanent reforms.

Take the present outstanding example of the use of the "strike" weapon. Last Spring hundreds of thousands of miners in the United States went on strike in order to enforce their demands in a controversy with the mine owners and operators. As to the rights and wrongs of the dispute we are not, so far as this article is concerned, in any way interested. Needed to say the right is not all on one side and the wrong on the other. But for five months now between half and three-quarters of a million men have been living in idleness—in idleness, a national calamity because of the injurious effects on character and the inevitable development of shiftlessness and other bad habits.

For five months no wage cheques have been coming in to support these men and their families probably a total of more than two million souls, and provide them with the comforts and necessities of life. They have had to depend on the meagre doles of "strike" pay out of Union funds and which had been deducted from their income in previous years. In the final analysis, therefore, these five months have been worse than absolutely lost to these hundreds of thousands of people.

The mine owners have suffered through deterioration of their properties and machinery, and through loss of profits on operation, but their loss has been small compared with that of their striking employees because the coal still remains in the ground to be mined at some future date and sold, in all probability, at a higher price because of the shortage created by nearly half a year of non-production.

Countless thousands of other workers have been forced to work on short time because of lack of sufficient fuel to keep industries and factories in which they were employed operating full time. Railways have been forced to reduce the number of trains in operation and schedules have been lowered. Great going vessels have been compelled to carry sufficient coal from foreign ports to enable them to make the return voyage because they could not get coal at American ports. And now, with winter approaching and surplus stocks of coal rapidly disappearing, the people of the North American continent are faced to face with the problem, not merely of keeping the wheels of industry revolving, but of actually keeping themselves from freezing to death in the months to come. Such coal as may be available will sell, it is feared, at an almost prohibitive price.

There are many other losses to be charged up against this "strike," as, for example, the loss of business to merchants everywhere in the mining regions because of the loss to the State resulting from the necessity of maintaining increased forces of police and military to maintain order when tens of thousands of people are living in idleness and suffering from a sense of wrong and injustice.

And what can possibly be written eventually on the other side of the ledger to offset these enormous losses? The strike will be settled sooner or later, and almost certainly in a compromise of some kind. That compromise could just as well have been reached in a conference by arbitration before the strike as now after months of suffering and loss. Even should one side gain everything for which they are holding out, that gain will not begin to compensate for the loss.

Industrial war waged through "strikes" is just as senseless, just as futile, as war waged between nations. Both nations and workers suffer and lose in their train, and practically no gain. But capital and labor both remain blind to this fact; each refuses to see any side but their own. And statesmen remain timid and fearful and apparently have not the courage to grapple with the thorny problem and provide by law some method which will prevent further repetitions of this same folly. It must be ended eventually, but apparently it is going to take some industrial upheaval comparable only to the Great War to bring the peoples of the world to their senses, and cause "the public" to rise in their might and say "this thing has got to stop."

Weekly Newspaper Renders Valuable Service

Has a Field of Usefulness Peculiarly Its Own

The important service which the country weekly renders its community by publishing timely agricultural news, was emphasized by W. A. MacLeod, Commissioner of Publications for the Saskatchewan Government, in an address delivered by him at the Western Publishers' Short Course and Conference held recently at the Manitoba Agricultural College.

There is a vital distinction between the news field of the weekly paper and the city daily, the speaker stated, as the daily newspaper deals very largely with what might be described as "bad news," wars, revolutions, murders, accidents, calamities of one kind or another, and the weekly newspaper, dealing largely in local activities, appeals most to its readers when it devotes most of its space to "good news," information about the social life and the progress and development of the district and community, and in an agricultural community the agricultural news sent out by the Federal and Provincial Governments provides an important source of information.

Illustrations were given of how the value of agricultural news sent out in the form of bulletins or news articles was very greatly increased when the editor gave the article a local color by adding to the article some news of local conditions concerning the same subject. Information about the best varieties of cereals or forage plants is of far greater interest to readers if the editor can tell of some local farmer who is experimenting with these varieties, and news of an outbreak of insect pests gains much in value if the editor can give accurate information as to local conditions in connection with such an outbreak.

Governments, both Federal and Provincial, have invested very large sums in experimental farms and agricultural colleges where experiments are carried out of the highest importance to agriculture, and the weekly press renders a great service not only to its readers in the country generally when the results obtained is published even if the paper cannot afford more space than merely to quote the general results and direct the reader to bulletins or reports giving more detailed and complete information can be secured.

The value of pictures to illustrate the text was referred to, but about the only way in which illustrated agricultural articles could be used by the average country weekly was when they run in the ready-print portion of the paper, and the speaker expressed his pleasure at the cordial co-operation extended by the ready-print company which supplied the ready-print for the majority of weekly papers in the prairie provinces in publishing cuts to show the best methods of identifying various insect pests and methods of control.

In closing, a reference was made to the very great demand for news of small space available in the average country paper, and to the importance of condensing the news articles as much as possible to make them available for weekly papers as the editor should not be expected to furnish the space and prepare the articles as well.

The weekly press of Western Canada was said to take a leading place in the quantity of valuable and timely farm news carried in its local pages.

Unearth Our Resources

Ottawa Government Placing Thirty-Nine Survey Parties in the Field

The Ottawa Government is to be congratulated on taking practical steps to aid in developing Canada's natural resources by placing thirty-nine survey parties in the field in the hope of finding new deposits which will be the means of furnishing employment and railway tonnage.

These parties are to go to work in every province and the territories as well, including the Yukon. These uncovered resources will prove when opened up, to add much to the wealth of the Dominion and will tend considerably to increase our prosperity. A commendable feature of the policy is to confine the work of investigation to territory within reasonable distance of transportation routes rather than send parties into remote districts—Montreal Herald.

W. N. U. 1428

To Exhibit Alberta Tar Sands

Samples Are Being Sent to State Fairs in U.S.

Samples of Alberta coal and the famous Athabasca tar sands will be included in the exhibits of natural resources that the Government is sending to four state and inter-state fairs across the line. While the bulk of the displays thus being made for publicity's sake will be agricultural in character, it has been decided to show something also of the province's mineral wealth, and there will be some big pieces of coal, chosen from several mines in both the northern and southern mining fields, together with a generous portion of the bituminous sand-stuff.

Pictures of mining operations will also be included in the pictorial section of the exhibit. These will be interspersed with the elaborate showing of farm pictures now being prepared for the purpose, and will give a graphic idea of the underground riches of this province as well as of its agricultural resources.

Every knock one man gives another is intended for a boost for himself.

Minard's Liniment for Dandruff

When a woman tries to capture a wealthy husband she evidently believes that his means will justify her ends.

New Irrigation District

Farmers in the district east of Reliance, Alta., have decided to form the New West Irrigation District. The area in this district will be about 4,700 irrigable acres, and every effort is to be put forth to have the construction work done this summer in order that the water may be available for the land next season.

SUMMER HEAT HARD ON BABY

No season of the year is so dangerous to the life of little ones as is the summer. The excessive heat throws the little stomach out of order so quickly that unless prompt aid is at hand the baby may be beyond all human help before the mother realizes he is ill. Summer is the season when diarrhoea, cholera infantum, dysentery and colic are most prevalent. Any of these troubles may prove deadly if not promptly treated. During the summer mother's best friend is Baby's Own Tablets. They regulate the bowels, sweeten the stomach and keep baby healthy. The Tablets are sold by medicine dealers or by mail at 25 cents a box from 'The Dr. Williams' Medicine Co., Brockville, Ont.

From a literary point of view, fame consists in having people know you have written a lot of things they haven't read.

An iceberg that rises 100 feet above the water stretches 700 feet below it.

UNLESS you see the name "Bayer" on tablets, you are not getting Aspirin at all

Accept only an "unbroken package" of "Bayer Tablets of Aspirin," which contains directions and dose worked out by physicians during 22 years and proved safe by millions for

Colds Headache Rheumatism
Toothache Neuralgia Neuritis

British Empire Exhibition Planned To Be Greatest World Has Ever Seen

The greatest exhibition the world has ever seen is to be held in London in 1924 at Wembley Park, and will be called the British Empire Exhibition. Already great halls that will be permanent structures are beginning to rise from among the undulating slopes of one of the most charming natural parks near to the metropolis, and the quietness which reigned over the scene when the Duke of York cut the first turf last January has given place to the activities of hundreds of workmen and the incessant noise of great machines performing prodigies of labor.

A representative of The Daily Telegraph visited the site a few days ago and in company with the architect, J. W. Simpson and Maxwell Ayrton, and the engineer, E. O. Williams, went over the ground. In the course of time the halls, which are being erected and equipped by the Government of all parts of the British Empire, will reveal themselves in classic beauty and grandeur, but at present it is only possible to marvel at the immensity of the task in building and the progress that has been made in so short a space of time. The two buildings farthest advanced are those in which will be housed the industries of the United Kingdom. They cover a space four times the size of Trafalgar Square, while in length they would reach from the Carlton Hotel across Trafalgar Square and down Northumberland Avenue to the river. Far away in one direction the architect's plan indicates the site of the Australian pavilion, for which the Commonwealth has voted a quarter of a million pounds, while in the opposite direction is the corresponding site, which it is hoped Canada will take up. Then there are the small halls of South Africa, New Zealand, India, West Africa and so on. Railways of full and narrow gauge intersect the ground, and over them there are continuously passing goods trains laden with steel girders and other heavy stuff, or small trucks drawn by powerful little motor engines, conveying materials from one part of the grounds to another.

There are stacks upon stacks of drain pipes waiting to be buried and great piles of steel wire netting—enough, it is said, completely to encircle the earth—for use as reinforcement for the concrete, of which all the buildings are being made. The most wonderful sight of all is to be met with in the area covered by the empire stadium, where the cup will be played next year. The contractors, who are working are making a special effort to expedite this portion of their task, and already the immense arena, which will accommodate 125,000 sightseers round a playing pitch of three acres is assuming shape, and the skeleton of the far-flung stands is visible. Within this area there are great and extraordinary machines at work grabbing up and removing the heavy clay ground two tons at a time, leaving nurseries to smooth over the surface in preparation for the turf, which will all come from another portion of the park, and is being "nursed" for this purpose. The contractors have to remove the old Watkin Tower, which was originally intended by Sir Edward Watkin to be a second Eiffel Tower, because it stood in the centre of the stadium, and the last portion of it has been blown up with dynamite.

Very complete arrangements are being made by the railways which serve the exhibition—and they are numerous—to cope with the traffic. The exhibition is nine minutes by train from Baker Street to Wembley Park on the Metropolitan Railway, and a similar distance from Marylebone on the Great Central Railway, whose station Wembley Hill, is at the southern entrance of the exhibition. Wembley Station on the London and North Western Railway, and the Bakerloo tube, and Alport, on the District Railway, are close to the exhibition grounds. There are over 140 city and suburban stations north, east, west and south of London, from which direct access to the exhibition, without change, is obtainable.

Hot liquids can be frozen by application of pressure alone.

W. N. U. 1484

Whistling of Marmots May Be Broadcasted

Novel Treat for Radio Fans If Idea is Carried Out

"The next number on tonight's programme will be a piccolo imitation entitled 'The Whistling Chorus,' by the Rocky Mountain Marmot Singing Society of 1,000,000 voices."

Such may be the announcement to astonish the ears of any number of listening radio fans in the near future. If a proposal before the national park service of the interior department is carried through, it will be possible the next summer to hear the shrill whistles of these small dog-like animals.

Within fifty miles of the park, in the northern part of Montana near the Canadian border, lives the largest colony of the animals on the North American continent. It is estimated there are close to 1,000,000 of them living in dense population. On still nights the wonderful shrilling chorus of the piccolo-like voices is carried miles on the rare mountain air, and tourists in the camps enjoy the evening programme immensely.

It has been proposed that a receiving and broadcasting station of the west capacity, sending at a 360-meter wavelength, be installed close enough to catch the voices clearly. Such power would be capable of sending throughout a radius of 1,500 miles and could be picked up almost from coast to coast.

When the full chorus is on it sounds as if a whole city of people were playing piccolos in concert.

Soviet May Coin Platinum Money

Russia Mines Nearly All of World's Supply

A message from Europe, which may be true and may not, says that the Soviet Government has for a long time been accumulating platinum with view to coining it. Russia produces nearly all of the platinum mined in the world, and if there were enough of it, that metal might make a desirable basis for a hard money system.

But a report by Russia to platinum as a basic money metal would be hopeless nevertheless because if Russia cornered the world's supply and continued to do so for the next hundred years it would still have less in value of platinum than the United States has in gold. In a good year at ordinary prices the total output of platinum is worth about \$10,000,000. Russia needs a billion dollars worth of gold upon which to rest a really adequate and sound monetary system.—Detroit Free Press.

Prehistoric Drawings of Pleiades

Cave Dwellers Evidently Had Sharper Eyes than Modern Astronomers

Certain prehistoric drawings made by cave dwellers have been found, and Professor Bigourdan, recently made an interesting report to the French Academy of Sciences concerning them. He states that the drawings evidently portrayed the Pleiades. The singular thing about these drawings is that they all exhibit groups of ten stars, whereas modern observers of the skies are able to perceive with the unaided eye only seven stars of this group. The ten stars which form the group are visible today only by means of a telescope or from the top of a high mountain. This raises the question as to whether the cave men were already so skilled in astronomy that they knew that more stars were visible from the summit of a mountain than from the plains. If they did not possess this knowledge, we can only suppose either that primitive man was gifted with much sharper eyes than his present descendants, or also that the brightness of the Pleiades had become much diminished.

Newspaper Short Course

R. Fahri, Elected President of Manitoba Division of Weekly Newspapers Association

Roy Fahri, of Gladstone, Man., was elected president of the Manitoba division of the Canadian Weekly Newspapers' Association, at the final session of the short course and conference of publishers in the Agricultural College, Winnipeg, C. H. Saults, Winnipeg, was re-elected to the office of secretary.

Reports indicating a satisfactory year were presented by Mr. Saults and by J. A. MacLachlan, Virden, the retiring president. Considerable discussion took place on the question of wages for job printing.

Roy Ashwin, of the Publishers' Advertising Agency, Regina, gave a report on the year's business of the firm. The Advertising Agency and the Local Paper was the subject of an address given by Bruce Campbell, while W. A. McLeod, Editor of Publications, Department of Agriculture, Regina, presented "Government Agricultural News," and Bruce Walker also addressed the gathering.

Conserving a Resource

Last Remaining Band of Buffalo Not in Captivity

The Dominion Government is taking steps to protect Canada's herd of wild buffalo, the last remaining band still living without a wire fence around it. It may be mainly sentiment that prompts the preservation of the species, for their range is northern home, but it is a sentiment that is well worth paying for. And it may not be in the long run turn out to have been a bad investment from the utilitarian standpoint. Fur coats and robes will be in demand for all time, and the hide of the bison provides material for them that is both attractive and durable. Buffalo meat is declared by those who have tried both to be superior to beef. If it pays to run forams and rat farms, and akum farms for the sake of the pelts, it may be found profitable to run buffalo herds for the sake of the hides and the meat.—Edmonton Bulletin.

New Farming Areas Of Northern Saskatchewan Potential Wheat Country

In the tremendous expansiveness of the Western Canadian provinces and their comparatively recent date of settlement, it may be generally stated that the portions of the province about which little or nothing is known are more extensive than those which have been settled. The areas north of the settled regions, in fact, constitute the greater portion of each province. In Saskatchewan, after passing a little north of the Saskatchewan River, a country is penetrated which is entirely new, one not yet carefully explored, and about which, for the main part, information is rather vague. The map shows it to be a country well watered and the numerous posts of the Hudson's Bay Company indicate that it is a profitable fur country. But of its agricultural possibilities little is generally known.

Recently a collection has been made of the reports on this area, misgiving enough, of the North-West Territories Government the Department of the Interior of the Dominion Government, and of two exploration parties sent out by the Saskatchewan Government, which despite their fragmentary nature indicate that vast tracts of rich agricultural land, running into many millions of acres, exist in this area directly tributary to present settlement. That climatic conditions offer no obstacle to farming there, and that where experiments in agriculture have been attempted they have been successful. The presence of large bodies of water, it is stated, have a moderating influence upon the climate, giving the area mild seasons than sections of the province further south, and the sceptical have but to give due consideration to the fact that in the same parallel as the Peace River country, looked to as one of the potentially greatest wheat growing areas of the Dominion and which produced the world's prize wheat more than twenty years ago.

To all intents and purposes this area under consideration is unexplored except for certain settlements of Indians and half-breeds, occasional church missions and a few scattered fur posts. The only agricultural project attempted in this region is such as is to be found at these little settlements, being necessarily on a small scale, but having been carried on for, in some cases, the space of half a century, what has been done, however, is sufficient to give a fairly good indication of agricultural possibilities on a large scale when farm settlements shall have filled up the area.

The area considered in the survey is that lying north of the town of North Battleford and Prince Albert, between the Saskatchewan and the Churchill Rivers, described as a gently rising country, having much the appearance of North-Western Manitoba, the land being well adapted to farming. The soil for the main part is a rich loam with a subsoil of sandy clay, much of the land being sparsely covered with spruce and pine. Local conditions make the pursuit of every kind of agriculture possible, grain growing being adapted to a large area, mixed farming suggesting itself as more profitable on a larger expanse, whilst certain sections are said to be unsuited for the west for cattle ranching. Along the Clearwater River and valley is described as splendid ranching country, with hay abounding and water and timber locally available, the rolling hills blown clear of snow in the winter affording excellent range for stock. Equally fine range is to be found in the Pembina Valley, whilst the Meadow Lake district, which is practically free from frost, is described by the explorers as some of the very best land in Canada.

At Lac la Ronge, approximately one hundred miles north of Prince Albert, wheat has been raised for many years without suffering from frost, and the missionaries, whilst potatoes are raised every year with good results. In the Pembina Valley, much further north, wheat and oats have been grown in small quantities since 1880, whilst every variety of vegetables was seen in the gardens, thriving in the very best of conditions—potatoes, cauliflower, lima beans, green peas, carrots, turnips, melons, lettuce, beets, parsnips and tomatoes. The Indians here grow a little barley and claim that they have never had a failure of this crop for fifty years. Small fruits also grow excellently, splendid crops being secured of wild currants, gooseberries, raspberries and strawberries, all large and mature. At other places, potatoes, oats and barley have been grown for thirty-five years without record of failure.

Explorers have estimated that in this area between the two rivers there are ten million acres of land, in large and small tracts, capable of producing crops which will enable settlers to make a comfortable livelihood. Whilst the addition of these millions of acres to the province's available farming lands may not be an important consideration at the present time when Saskatchewan has yet much unexplored land to be settled, yet the disclosure of this possession is significant of the almost limitless possibilities of agriculture in an area already producing an annual volume of 185,000,000 bushels of wheat, or half the Dominion's yield of this crop. Looking back at Saskatchewan's sparse state of settlement a quarter of a century ago, and in the light of its present production, it is not difficult to foresee the time when these northern tracts, surveyed and made more accessible, will be producing as fine crops as those raised at present in the sections to the south.

To Wider Fields

A young country minister, noted for his jollity, was dining at a farmhouse one Sunday and when his plate of roast chicken was passed to him, he remarked facetiously:

"Well, here's where that chicken comes from the poultry."

"Hope it does better there than it did in lay work," rejoined the bright boy of the family.—Boston Transcript.

Probably the oldest literary competition in the world is the Big Veda in Sanskrit.

Stella Tells Her Brownies About Electrical Eels

"JUST imagine an Eel," Stella, the Whistling Fairy, was saying, "that seems charged with electricity—at least people say this of it. They call it an Electrical Eel, for they no more know what to call it, or how to explain its strength than they can account for the electricity that descends from the sky. They know that it exists, this electric current from beyond the clouds, and they also realize that they are unable to bind and hold it; that it is more powerful than they are with its ruthlessness and strength, but this is about as far as they have positively gotten. In the same way no one can explain the strange power of the Electrical Eel, it exists and there you are!"

"What's an Eel?" asked a Brownie. "Tell us." "An Eel," explained Stella, "is a creature of the water. It looks like a Snake, but it is no more a Snake than a man is a horse. It is on the lines of a Snake and a Human consider it very good food. At least, I should think that those Humans enjoy eating it, who know that it tastes as deliciously as the most delicate fish. It is a Fish."

Stella has a cousin whose name is Pearl and she is the mermaid Pearl at the End-of-the-Sea, just as Stella is the Whistling Fairy at the End-of-the-Eel. It exists and there you are! It seems that once upon a time a plain, ordinary Eel that had no means of defending itself against its enemies went to Pearl with a wish for her to make come true. The wish was to be able to defend itself when in danger against larger fish, and she gave it this mysterious electricity that has pushed every one ever since.

Instead of living in the sea the Electrical Eel's home is in fresh water. It lives in lakes and ponds, and when afraid it simply uses this curious power of turning its battery of electricity upon the creature that is attacking it. The result is that the enemy is stunned by being completely stunned and sinks helplessly down in the deep water, while the Eel swims away in safety.

"Often in South American fresh waters," Stella continued, "where these fish are found, the natives ride headlong on horses into some lake to catch them. Terrible fights then take place, for the Eels defend themselves, not on the full force of their body bound electrically and often horse after horse is stunned to such an extent that they all are unable to even stand, much less carry their riders. Lots of them are drowned. It's terribly exciting—this electricity!"

"I think it's perfectly awful!" excited Kinkajou exclaimed in disgust. "As far as I am concerned I don't understand, and I don't think I ever could understand the natives' habit of riding from giving pain and fright—and death—to other creatures less strong than they are. I think that hunting is a terrible pastime."

"Well," answered the Whistling Fairy, whose heart is as big as her magic is powerful, "I rather agree with you; yet such things unfortunately exist, and we have to look them in the face. After all, I was only telling you about an Eel that my cousin once helped."

"Can it thus arrest the fish whose bodies don't touch it?"

"Yes," answered Stella, "they are even able to numb fish that are some distance away from them."

Discovered True Remedy For Systematic Catarrh

A bad case of Catarrh is not an easy thing to treat, and a remedy that makes good catarrh, grade credit. Catarrh comes certainly fixed up. Chas. H. Webb, who writes from Woodstock, Ont., a number of years I was troubled with Systematic Catarrh. Nothing helped me very much. I used Catarrh Inhaler and got relief. To build up my system, I used Perone. This combination can't be beaten. They made me well. Your case may also be bad, but Catarrh case will do for you what it did for Mr. Webb. Two months treatment, \$1.00, small size box. All dealers or the Catarrh Inhaler Co., Montreal.

XIII.
Occidental Hotel, Carbon City,
Alberta.

July 27th, 19—

"I put myself to bed at eight o'clock to-night on purpose to see if I could catch up the sleep I lost between here and Winnipeg, and now, at a quarter-past nine, I am still wide awake. As usual, I sleep badly my first night on the train, and last night was even worse, for we had to change cars at midnight and we reached Carbon City at three o'clock in the morning. So with two broken nights behind me I am not sure whether it is to-day or to-morrow.

As to why I cannot go to sleep when I wish to do so—well, who could go to sleep when just across the hall a number of convays are singing at the tops of voices trained in the great out-door-fests.

The chorus of one song, oft repeated, is quite audible:
"Farewell, my Bloo-bell, farewell to you,
Just one fond glance into your eyes of blue,
Mid camp-fires gleaming, midst shot and shell,
I will be dreaming of my own Bloo-bell."

Whoever is playing the accompaniment has played more difficult music than "Bloo-bell." Who is he, I wonder—or is it she? Hardly the latter, I think, for I cannot hear a woman's voice.

A notice over the piano is to the effect that all music must cease at half-past ten. Until that time I shall have to submit to the serenade, I presume.

Mr. and Mrs. Bingham and Sunny and I—have become "Antile Elbow," by the way—left Winnipeg Monday evening. "We women," to quote

Sunny, occupied what is known as a private compartment at one end of the Pullman, and containing two berths and a couch. In view of the fact that I like to watch my fellow-travellers, I considered the state-room an unnecessary luxury—ten marks off for pleasure. But I must admit that at night it was pleasant to know that the berth above or below one was not occupied by a stranger. And it seems, although I do not know that my supposition can be confirmed by statistics, that the said stranger is always a fat man who snores excruciatingly.

I can truthfully say that the lack of picturesque scenery between Winnipeg and Carbon City was a disappointment. Mile after mile we rattled over level prairie, nothing ahead of us and nothing behind us but two steel rails. All the little towns looked alike, and after we had passed a dozen of them I concluded that the name was placed so prominently on the station in order that passengers might know when they had reached their own town, otherwise I cannot see why they would ever feel sure. The bigger towns, Brandon, Regina, Moose Jaw and Medicine Hat, however, give evidence of life and originality, even to one who only sees them from the coach window.

At Regina I saw my first Mounted Policeman. He was altogether beautiful, and I only hope that his nice shiny boots did not pinch him, and that he was not injured too lightly. "The red coats of the North-West Mounted Police"—what a Ralph Connerly thrill it gives one, approaching in degree if not in kind that attendant upon a dose of quinine.

As I said before, we reached Carbon City at three o'clock in the morning. We came directly to the hotel, where Mr. Bingham had rooms reserved for us. So it was not until after my twelve o'clock breakfast that I saw anything of the town. The hotel is palatial compared with the Palace Boarding House. But hot and cold water, electricity, light, and a regulation dining-room, all of which I found to my advantage, made the place a very pleasant one around Carbon City, and showed me all the places of which they, as citizens, have reason to be proud.

Carbon City, as it appeared to me, is midway between Winnipeg and Elbow—I hope no one thinks that I mean this geographically—with a slight leaning towards the latter place.

It one could take aerial views of buildings from Main Street, Winnipeg, and from Main Street, Elbow, one would have a fair imitation of Main Street, Carbon City. Side by side with a low frame shack, none too substantial and sadly lacking in paint, one sees a four-storey brick office building with stone trimmings and a goodly adornment of plant-giants and flowers. In the residence district the contrasts are not so great, plain and unassuming houses are the rule. And there are no trees or gardens—a dry climate and an incessant wind discourages the most enthusiastic of gardeners.

After dinner we went for another walk, but this time we took no direction, away from the town and towards the river. At this season the river is very narrow and very shallow, but they tell me that at times the whole valley has been flooded. Properly speaking, the river has no banks, but runs through a level plain perhaps a quarter of a mile wide at this point. Then comes the hills again, bare and brown and uncanny-looking to one used to the wooded hills of England.

"The foothills of the Rockies" is a phrase that gives a wrong impression. I expected to see a succession of hills gradually becoming higher until they were mountains, but the appearance is rather that of wide plains cut by deep valleys, technically known as canyons. As the mountains are not visible from Carbon City there is nothing to give me the feeling that I am in a high altitude. Even looking up from the river-bottom I felt only as if I were in a ditch!

The rarity of the atmosphere plays strange tricks with me. At one moment it seemed that I could have touched the opposite side of the canyon by putting out my hand, but even as I looked it appeared to recede mysteriously until it was miles away—and always, near or far, austere and unapproachable.

On the whole, Southern Alberta has not impressed me favourably. The great bare spaces marred and rendered unnatural by the atmospheric peculiarities that I have mentioned, and the arrogant sunshine "get on my nerves."

Mrs. Bingham is very comforting in this connection. She tells me that when she first came here she felt just as I do, and that now she loves the place and feels out of her element away from it. "She gives as the reason for the unpleasant effect on the newcomer a nervous irritation due to the excessive stimulation of air and altitude, and she assures me that I shall soon adjust myself to the change. Perhaps.

In spite of the note in the parlour I find that I am growing sleepy. The great bare spaces marred and rendered unnatural by the atmospheric peculiarities that I have mentioned, and the arrogant sunshine "get on my nerves."

(To be continued)

The wood of which the Ark was built has been identified by many scientists as cypress.

Worth More Than Gold To McPhail

Declares Tanlac Is Most Wonderful
Medicine In The World

"The good 'I have received from Tanlac cannot be measured in dollars and cents," said Arthur C. McPhail, 758 Wellington Ave., Winnipeg, Man. "I have been in failing health ever since the attack of the flu followed by pneumonia some three years ago. As time went on instead of rallying, my strength I seemed to be losing ground daily. I had no appetite, my stomach was upset and my whole system was so weakened that it was only by sheer force of will power I kept from collapsing completely.

"I am in perfect health now, eat, sleep, work and feel better than in years. Tanlac is in truth a wonderful medicine."

Tanlac is sold by all good druggists.

Champion Typist

George L. Howfield, of Patterson, N.J., won an international typewriting speed contest at the Parent of Progress, Chicago, against a field of 160 entrants by writing 126 words a minute for 30 minutes.

No Cause For Worry WHEN CHILDREN HAVE Summer Complaints

There is not a summer passes but that thousands of men, women and children are attacked by summer complaints such as diarrhoea, dysentery, colic, cramps and pains in the stomach, cholera, cholera morbus, cholera infantum, etc.

In looking for relief you should not delay in getting a bottle of Dr. Fowler's Extract of Wild Strawberry, a remedy that has been on the market for the past 77 years, and has stood the test of time.

Mr. Geo. Chapman, Sudbury, Ont., writes:—"I am the mother of five children and I must say they are seldom sick or in need of medicine. They are, however, sometimes troubled with summer complaint, diarrhoea, and such like, but I always find there is no cause for worry as I just give them two or three doses, no more, of Dr. Fowler's Extract of Wild Strawberry, and the trouble soon disappears. It is a remedy that all mothers should keep in the home for the children."

"Dr. Fowler's" is 50c a bottle; put up only by The T. Millburn Co. Limited, Toronto, Ont.

If a woman is unwilling to take in washing and scrubbing to support her family she has no business to marry a man to reform him.

Minard's Liniment for Burns, etc.

Hammocks are supposed to have received their name from the fact that the natives of Brazil used the bark of the hammock tree for nets in which to sleep.

LACE! EVERYBODY IS WEARING IT NOW

Most attractive and satisfactory for a dinner and dancing frock is this beige Spanish lace over georgette. Lace is quite the craze now. It is being used for most everything. The circle is of georgette braided with flowers.

Miller's Worm Powders, being in demand everywhere, can be got at any chemist's or drug shop, at very small cost. They are a reliable remedy for worm troubles and can be fully relied upon to expel worms from the system and abate the sufferings that worms cause. There are many mothers that rejoice that they found available so effective a remedy for the relief of their children.

Do Your Own Thinking

Try a little thinking on your own account. The novelty of it would repay a lot of people for the expense. Don't let your tongue and your thoughts all the time. Go for a walk with yourself occasionally. It may turn out to be quite an adventure.—London Daily Express.

Every Man to His Trade
A Scotch minister met an old linker who never came to the Kirk. "Can ye say the Lord's Prayer yet?" he asked, "after all my exhortations to ye?" "Every mon tae his trade," answered the linker. "Can ye make a tin pal?"

Reduced by Asthma. The constant strain of asthma brings the patient to a dreadful state of hopeless exhaustion. Early use should by all means be made of the famous Dr. J. D. Kollogg's Asthma Remedy, which more than any other acts quickly and surely on the air passages and brings blessed relief and comfort. No home where asthma is present in the least degree should be without this great remedy.

A giant Redwood tree 210 feet high was recently moved 20 feet without lowering from its vertical position.

Sweet and palatable, Mother Graves' Worm Exterminator is acceptable to children, and it does its work surely and promptly.

An ostrich is first picked of its plumes when less than a year old and then every nine months of its life.

Minard's Liniment Relieves Neuralgia

The largest known egg is that of the extinct elephant bird of Madagascar, its contents being about two gallons.

There may be other corn removers, but you will not be completely satisfied until you have used Holloway's Corn Remover.

Lions, France is paved with de-fritted glass; the blocks being so closely fitted that water cannot pass between them.

The right breakfast makes the day's work easy

HEAVY, starchy foods slow down both body and mind. Grape-Nuts speeds them up for the day's work.

This wholesome, healthful cereal food is made from prime wheat and malted barley, baked for 20 hours to insure easy digestion and perfect assimilation.

All the nutritive and mineral elements of the grains, which Nature needs to feed the tissues, glands, bone and blood, are retained in Grape-Nuts.

Weight for weight, there is more actual nourishment in Grape-Nuts than in roast beef. A Dominion Government analysis shows that Grape-Nuts contains 1799 calories to the pound, whereas a rib roast of beef as purchased (with its 20% of refuse) is known to contain but 1110 calories to the pound.

Delicious Grape-Nuts is most economical, too, affording more breakfasts in less bulk than any other cereal food.

Sold by grocers everywhere

I'm So Tired

Fatigue is the result of poisons in the blood. So when the kidneys fail to purify the blood one of the first indications is unusual and persistent tired feelings and pains in the back.

Neglected kidney troubles lead to years of suffering from rheumatism or develop into such fatal ailments as Bright's disease.

The kidney action is promptly corrected by use of Dr. Chase's Kidney-Liver Pills—the best known regulator of kidneys, liver and bowels.

Mrs. John Ireland, R.R. No. 2, King, Ont., writes:

"I was a great sufferer from severe headaches and bilious spells. I tried a number of remedies without obtaining any benefit until I was advised to use Dr. Chase's Kidney-Liver Pills. These completely relieved me and made me feel like a new person. I am very grateful to Dr. Chase's medicines for what they have done for me, and you may use my letter for the benefit of others."

Dr. Chase's Kidney-Liver Pills, one pill a dose, 25c. All dealers or Edmondson, Bayle & Co., Ltd., Toronto.

Serious Aspect To Coal Strike Situation In Nova Scotia Fields

Ottawa.—In an effort to prevent the flooding of the coal mines in Nova Scotia, Hon. James Murdock, Minister of Labor, has requested the assistance of John L. Lewis, President United Mine Workers of America. Mr. Murdock has urged President Lewis to wire to officers of the United Mine Workers of America in Nova Scotia suggesting that they do not permit the mines to be flooded, causing "irreparable damage," and that an opportunity be given for further negotiations between the men and the British Empire Steel Corporation. It is understood here that President Lewis has telegraphed to the officers of the U. M. W. A. in the Nova Scotia fields in accordance with the request of the Minister of Labor, but the terms of his message have not been received here. It is reported here that already very serious damage has been done to the mines by flooding.

Colonel Elkins, with 250 troops from Halifax, has occupied number two colliery at New Aberdeen, after cars with a party of workers who had been sent from Sydney to man the pumps had been stoned and the workers sent back to Sydney. Reports from Pictou and Cumberland counties maintained that all is peaceful there. New Aberdeen is a water centre and is regarded as the storm centre.

Calgary.—There is no indication that the coal miners' strike in District 15, in any near a settlement through the renewed efforts of Hon. James Murdock, Federal Minister of Labor. The minister had a further conference with the men's officials, but without any satisfactory results.

Cattle Men Appeal Against Tariff Duties

Claim High Rates Hurt Trade Between U.S. and Canada

Washington.—Believing they will be greatly harmed by the emergency tariff duties on cattle and the cattle duties proposed in the new tariff bill, Western Canadian cattle growers have sent individual letters to more than 30,000 United States farmers urging a change in the rate. The Canadian cattle men have also appealed to the Senate Finance Committee, House Ways and Means Committee and individual members of both Houses of Congress.

The Canadian cattle men seek to show the high rates do not benefit United States farmers and even actually hurt them by shutting off from the United States desirable "feeder cattle" which could be fattened in the United States to the advantage of the farmers in this country. Further, the Canadian cattle men point out that the high rates existent and proposed are hurting trade between the United States and Canada.

Ontario's Provincial Bank

People Have Deposited One Million In Six Weeks

Toronto.—The province of Ontario Savings Department has written one million dollars' worth of business in the first six weeks in operation. Over 100 representatives of the Assured Savings' Branch of the Provincial Bank held a dinner last week and reviewed the work, which has been sensational in Ontario.

Congratulations have been showered upon the staff of Ontario's Bank for their energies which have attracted thousands of citizens. Mr. McKenna, director of the Province of Ontario Savings Department, told of the initial obstacles which confronted the members, and said the loyalty of those who launched the project was responsible for its huge success in so short a period.

Refreshes Weary Eyes
When your eyes feel dull and heavy, use Murine. It is the most reliable relief for tired eyes—makes them clear, bright and sparkling. Recommended by all doctors.

World Mourns Death Of Lord Northcliffe

Messages Significant of Esteem In Which Publisher Was Held

London.—World-wide regret at the death of Viscount Northcliffe continues to be evinced by the flood of telegrams and cable messages received by the family and published in Northcliffe papers. The messages sent to Lord Northcliffe by the King and Queen and other members of the Royal Family and the tribute from Premier Harding are significant of the esteem in which the great publisher was held, says the Times.

The President of France, the Viceroy of India and the Dominion Commonwealth Premiers are on with distinguished men of the United States in attesting to Northcliffe's work and the eminence of his achievements. The scores of messages composed more than a page of the Times.

Dublin Silent While Leader Is Buried

All Activities Suspended During Burial of Arthur Griffith

Dublin.—Ireland buried another of her distinguished sons. Arthur Griffith was laid to rest in Inverness Cemetery, after services of impressive solemnity in the beautiful cathedral of the Immaculate Conception. Many attended the Requiem High Mass for the repose of the soul of the departed leader—celebrated with all rites and ceremony of the Roman Catholic Church. The cathedral was crowded, and the thousands unable to gain admission to the edifice stood in the streets outside following as nearly as possible the service they could not see.

All activities in Dublin were suspended during the funeral.

American Judge Is Suspicious

Thinks Many Canadians Obtaining Divorces in Detroit Evading Law

Detroit, Mich.—Convinced that hundreds of Canadians are obtaining divorces in Detroit every year by falsely representing themselves as residents of the city, Judge Rich has ordered Edward Pokorny, clerk to the court, to investigate the residence of every Canadian who files suit for divorce.

"I will not grant a decree in any Canadian case until Mr. Pokorny assures me that one of the parties has really lived here two years as required by the statute," said Judge Rich. "So many suits are being filed by Canadians that it has made me very suspicious."

POSSIBLY YOUR OWN WIFE

She may not look so young and pretty as she used to. If her cheeks are hollow and pale, if she is tired and nervous, her system needs a good regulating with Dr. Hamilton's Pills, a real medicine that is noted for restoring the bloom of health to sickly girls and women. Dr. Hamilton's Pills regulate the entire system. Constipation quickly becomes rosy, spirits rise, strength increases daily. Health, vigor and good looks will soon return to a faded woman. If she uses Dr. Hamilton's Pills. Sold everywhere, in a paper box, or from the Catarthorpe Co., Montreal.

Three Hurt In Mine Accident
Glacier Bay, N.S.—William Cameron had a leg broken, Joseph McNeil received injuries to his head, and Daniel MacDonald was badly shaken, when the car in which they were about to descend into No. 2 mine at New Aberdeen went as instead of down and struck violently against the head of the cage shaft. Safety catches prevented it from plunging to the bottom of the 900 foot shaft.

Mount Robson Scaled
Edmonton.—Windsor Putnam, of San Francisco, with Jack Hargraves, Canadian guide, reached the peak of Mount Robson recently. This is the second time in history that Mount Robson has been climbed. It is the highest point in the Rockies.

Agree With Premier Poincare

Stand Taken at London Conference Is Approved by French Cabinet

Rambouillet, France.—Sitting under the presidency of President Millerand, the French Cabinet at its session here gave unanimous approval to the attitude taken by Premier Poincare at the recent conference of Allied Premiers in London, and also discussed the question of a moratorium for Germany.

On the matter of a moratorium, it was decided to await the forthcoming decision of the Reparations Commission, but plans were perfected regarding the measures to be adopted should the decision of the commission fail to agree with the French viewpoint.

Another decision arrived at was that for the time being the government need not call an extraordinary session of Parliament, so that the deputies and senators might be acquainted with the exact situation and the programme of the Government. Freedom of action was reserved, however, to consult with Parliament in the event that the plans adopted should require legislative endorsement.

Jewish Orphanage Burned

Montreal.—Twelve persons perished in the fire which destroyed the Jewish Boys' Orphanage at Shawbridge. Eight of the victims were inmates, the others being the janitor, his wife and their two children.

It was thought the fire originated in the basement. The Jewish Boys' Home was a summer annex of a Montreal institution. It accommodated 55 beds between 7 and 15 years of age. The building was of brick construction and three storeys high.

Death of Former C.P.R. Official

Winnipeg.—William Cross, aged 80, formerly assistant to the second vice-president, Canadian Pacific Railway, died at his home here. Mr. Cross was a native of England, coming to Canada in 1863. He was for many years connected with the mechanical department of the Montreal shops, and on his transfer west handled mechanical matters for western lines. After 40 years' service with the C.P.R. Mr. Cross was superannuated in 1904.

French War Ace Injured

Clement-Perrand, France.—Gilbert Sautier, the French "ace," who during the war brought down 15 German planes, was badly injured when in a Clement gliding triplane competing in the international gliding contest here, he was dashed to the ground after the control of the machine refused to respond. The machine was caught in a 30-mile wind and is a complete wreck.

Plan Ways And Means To Assist Farmers In Marketing Grain

Resents Criticism Of American Surgeon

Canadian Should Standardize Canada's Hospitals, Says Dr. McKeown

Toronto.—"If it is necessary to standardize the hospitals in Canada, it should be done by someone in Canada." This was the reply made by Dr. Walter McKeown, of St. Michael's Hospital to a criticism of Ontario hospitals made by Dr. M. T. McEachern, director of the American College of Surgeons.

Dr. McKeown continued: "We leave too much to the Americans and to such institutions as the Carnegie and Rockefeller Foundations."

Employment Increasing

Improvement in Labor Market Is Very Perceptible

Ottawa.—"The volume of employment is undoubtedly on the upgrade," was the optimistic view expressed by R. A. Riggs, newly appointed director of the Employment Service of the Department of Labor.

"Business is recovering unquestionably," he said. "We have touched the bottom of the ladder and we have begun to climb. We cannot expect to reach the top suddenly, or without considerable effort, but we are facing the right direction. The improvement in the labor market, though gradual, is very perceptible."

Mr. Riggs did not anticipate as hard a winter as the last two have been.

Disastrous Fire At Barons

Post Office, Postmaster's Residence and Implement Store Destroyed

Calgary, Alta.—A special despatch to the Herald, from Barons, Alta., says:

Fire completely destroyed the post office, residence of the postmaster, and the Barons Implement Company's warehouse and store.

The implement store and stock was valued at \$20,000, very little insurance being carried. The post office and residence of Postmaster Andrews, were valued at more than \$6,000, and were fully covered by insurance.

New South Wales Immigration

London.—The Government of New South Wales has agreed to the principle of the immigration scheme under which the Australian Commonwealth Government, New South Wales and Great Britain each pay a third of the cost of bringing out land settlers from the United Kingdom to New South Wales, says a Reuter despatch from Sydney.

Indian Village Bombed

Simla, British India.—In retaliation for an attack on a member of the Royal Welsh Fusiliers, near Lawsha, three fighting planes flew over the village of the tribesmen and dropped heavy bombs. Three persons were killed and two wounded, four houses were wrecked, a large area of crops was damaged, and a number of cattle were killed.

Exchange Flour For Welsh Coal

Welland, Ont.—The Maple Leaf Milling Company has arranged to take a load of flour to Wales soon, and on returning the cargo will consist of Welsh coal in order to assist the local fuel situation. The matter was given hearing in the City Council meeting and the Maple Leaf Milling Company commended for its efforts.

German Debt Increased

Berlin.—From August 1 to August 10, the floating debt of Germany increased \$500,000,000 marks, the aggregate on the later date \$18,400,000,000 marks.

Troops Demobilized

Columbus, Ohio.—Ohio National Guard troops sent to the various Ohio coal fields during the strike, were ordered returned to their armories and demobilized by Governor Davis.

Regina.—The Federal Government might assist farmers by calling a conference of bankers to devise ways and means to enable farmers to hold their grain long enough to prevent the usual fall glut of the market with its consequent flattening of prices.

This is in effect the suggestion wired by Premier Charles A. Dunning to Premier King in reply to the latter's telegram offering the co-operation of the Federal Government in the provision of measures as a substitute to the Wheat Board now that the latter has fallen through and asking for further suggestions from both Alberta and Saskatchewan Governments.

At the same time Mr. Dunning announced that he could call another conference this fall of creditor classes other than bankers with a view of securing their co-operation by extending leniency to farmer debtors. Mr. Dunning pointed out, however, that the banks came within Federal jurisdiction, and to come to any agreement with them would entail mediation by Dominion authorities.

Edmonton.—"Nothing more to be done," is the substance of Premier Greenfield's reply to the wire from Ottawa asking if the Dominion Government can be of further assistance in regard to the Wheat Board. With the failure to secure a chairman and vice-chairman for the board the incident is closed for the time being as far as this province is concerned, and no further action at the present time is desired or contemplated.

Mr. Greenfield says that the Prime Minister's suggestion in reference to creating an open-market for wheat does not raise any new point, since the market is already open and would not be otherwise until the board had started to function. Nor is there anything in the way of British and other buyers making such contracts as they may please.

The Provincial Government has nothing further to suggest just now, says the Alberta Premier and is acknowledging the offer from Ottawa with thanks, but without asking for any further action.

May Be Redistribution

Toronto.—With the postponement of the next provincial election to the fall of 1923, gossip at the Parliament Buildings has found a new subject in the probability of a redistribution of the Ontario electoral districts before the voters again go to the polls. The most important changes are expected to materially increase the representation of the cities in the new house.

The Government's Con- version Scheme.

The attention of the hold-
ers of the five and a half per
cent war loans maturing Dec.
1, 1922, is directed to the of-
fer of the Minister of Finance
to renew the loan on favor-
able terms. The last Cana-
dian loan was placed in New
York at a satisfactory price.
The Minister is making his
present financial operation en-
tirely a domestic one by of-
fering to exchange the matur-
ing bonds for new bonds bear-
ing the same rate of interest,
running for either five years
or ten years as the bondhold-
er may prefer. A further in-
ducement to the investor is
that he receives a bonus of
one month's interest. The
terms offered are decidedly
favorable to the investor and
it is probable that a large
part of the maturing loan will
be renewed. Arrangements
for the exchange of the bonds
can be made at any branch of
the chartered banks. Holders
who do not wish to reinvest
will be paid in cash on the 1st
December.

The Owners Mightn't Like It.

Since the wheat holding
board scheme has fallen thru
for this season, Premier Dun-
ning now comes forward with
the proposition that the banks
should arrange to advance
money to the farmers with
which to pay notes coming
due in the fall and to keep
their families thru the win-
ter; and thus enable the in-
dividual farmer to hold his
wheat in hope of a better
price.

The danger of this scheme
lies in the fact that the money
which the banks loan does
not belong to them—it be-
longs to innumerable people
who have deposited it with
the banks for safe keeping.

The owners of this money
might not approve the banks
thus undertaking in a whole-
sale way to back farmers in
speculating on the wheat
market. The fact that they
leave the money in the banks
at a low rate of interest, or
at no interest at all, indicates
that they at least have large
doubts about the certainty of
making money by buying
wheat and holding it for a
rise in price.

If the banks loaned a hun-
dred millions or so of this
money to enable farmers to
hold wheat; and, if wheat
prices made a sharp break,
it is conceivable that the de-
positors might get panicky,
raid the banks, and demand
their money.

What would then happen
has happened often enough to
not need recital.

Pure Seed.

Members of the faculty of
agriculture of the University
of Alberta and officials of the
Department of Agriculture
are out inspecting the fields
of seed grain which are com-
peting to come into the pure
seed class.

There are some two hun-
dred men in the Crop Im-
provement Association as
well as the members of the
Canadian Seed Growers As-
sociation whose crops have
to be carefully inspected be-
fore being graded into this
class of pure seed.

A real effort is being made both
by the farmers and the department
to establish the business of grow-
ing pure seed and to this end the
department of agriculture has tak-
en over the building formerly oc-
cupied by the North West Broom
company in Edmonton, and will
receive the seed grain there, clean
and grade and distribute it again.
This is being handled mostly in
sacks. Machinery is being install-
ed shortly for this purpose. The
same building provides a home for
the poultry and egg market-
ing service as carried on by the pro-
vincial government. Here they are
receiving, culling and distributing
eggs.

WHERE ONE BLADE GREW

It is not always the best soil that yields the richest
harvest. Much depends upon the man who cultivates
the soil, and the measure of his success is the measure of
his intelligent industry and thrift and ability to make the
most of opportunity.

The successful farmer cultivates his money as carefully as
he cultivates his land. He gets returns from his crops
and he gets returns from his funds. This Bank is any
part of the Dominion adds interest to the money saved
by industrious farmers. Our nearest Branch is at your
service.

WORLD HAPPENINGS BRIEFLY TOLD

It has been definitely announced by Premier Haasler that a radium institute for the cure of cancer will be established in Quebec before long.

While working at breaking up the obsolete battleship St. Vincent, at Dover, David Wilson, of Birkenhead, was killed by ten tons of armour plating falling on him.

Government engineers will shortly install fish ladders at Stamp River Falls, B.C., leading to Great Central Lake, to create a new spawning ground for salmon. The lake is on the west coast of Vancouver Island.

Necessity of an election of members for the Yukon Legislature, which had been fixed for September 14, was eliminated when candidates for three districts concerned were elected by acclamation.

The London Daily Chronicle announces that its net circulation now exceeds 1,000,000 copies a day. This represents the remarkable increase of more than 200,000 copies daily attained during the last twelve months.

Twenty cases marked "old iron," which had been embarked on board the steamer Mimil at Hamburg, have been found by the Italian authorities at Naples to contain pistols. They have been seized.

A Reuter despatch from Moscow says that as a result of intervention by the British Mission, the offices of the White Star and the Canadian Pacific Railways, which were closed by the Soviet Government, have been re-opened.

Admiral Sir John De Robeck has hoisted his flag as commander of the Atlantic fleet, succeeding Sir Chas. Madden. Sir John has been commander-in-chief of the Mediterranean fleet for about three years. He was born in 1862.

The Prince of Wales has fixed Friday, October 20, for his visit to the Guildhall to receive an address from the City Corporation and to lunch with them, in connection with his eight months' tour of the Dominions, India and Japan.

COULD HARDLY STAND AT TIMES

Hips, Back and Legs Would Have That Tired Ache

Everett, Washington.—"For several years I have had trouble with the lowest part of my back and my hips and my legs would ache with that tired ache. I could hardly stand on my feet at times. I was always able to do my work although I did not feel good. I saw Lydia E. Pinkham's Vegetable Compound advertised and having heard several praise it I decided to try it. I feel first-rate at the present time. It has done wonders for me and I keep it in the house right along. I always recommend it to those who are sick and ailing."—Mrs. M. Stinson, 4022 High St., Everett, Washington.

To do any kind of work, or to play for that matter, is next to impossible if you are suffering from some form of female trouble. It may cause your back or your legs to ache, it may make you nervous and irritable. You may be able to keep up and around, but you do not feel good.

Lydia E. Pinkham's Vegetable Compound is a medicine for women. It is especially adapted to relieve the cause of the trouble, and thus these annoying pains, aches and "no good" feelings disappear. It has done this for many, many women; why not give it a fair trial—now.

Prince Designed Gift
Personal Touch in Wedding Present to Lord Mountbatten
There was a personal touch about the Prince of Wales' wedding present to Lord Louis Mountbatten which was particularly charming. It was a gift of his own design. A silver figure of Atlas supports on its shoulders a silver globe wherein is traced in enamel the route of the Renown on her Indian and Australian voyages, in which the two young men were shipmates together.
Nothing could be more appropriate than such a present, which commemorates the comradeship of those memorable months. Wedding presents are too often conventional rather than personal, but perhaps the gift of the Prince will set a new fashion. This silver figure will always remind Lord Louis Mountbatten, as no cigarette case or tea set could do, of the experiences they shared together. Such a gift shows that the Prince is not only a cousin but also a friend.—From the Overseas Daily Mail.

THOUSANDS CONVERTED

Through ignorance, many have suffered aches and pains long thought incurable. But don't doubt quickly turn to relief with sedation, lumbago, and neuralgia are healed with Nervine. Its soothing healing powers are really wonderful. Nervine sinks in quickly, it penetrates into the sore muscles and brings grateful relief. The hundreds of case histories that come to every family yield quickly to Nervine. Try it. 35c at all dealers.

Grant For Alberta
The Federal Government has endorsed a grant of \$66,965 to the province of Alberta "for the purpose of aiding and advancing the farming industry of agriculture." The payment will be made from the revenue fund of Canada for the year ending March 31, 1932, and under the authority of the Agricultural Instruction Act.

IRRITABLE PEOPLE

Are Usually Victims of Poor Blood

Irritability is one of the manifestations of nervousness, and it becomes worse as the nervous become more unstrung and approach a state of exhaustion. No one is irritable from the outward expression of a great deal of physical suffering which friends do not realize. It is accompanied by headaches, sleeplessness, nervous indigestion and depression. Unless it is promptly checked more serious trouble develops.

The treatment for the earlier stages of nervousness, as well as the more advanced condition, is one of nutrition of the nerve cells, requiring rest, and the nerves get their nourishment from the blood. The treatment must be directed towards building up the blood. Dr. Williams' Pink Pills act directly on the blood, and have proved of the greatest benefit in a great many cases. A tendency to anemia or bloodlessness, shown by most nervous people, is also corrected by the tonic pills. This is shown by the case of Mr. Kenneth R. McDonald, Tarbot, N.S., who says: "For a long time I was a severe sufferer from nervous trouble, with the result that I grew pale and weak, lost weight, slept poorly, and always felt tired out. Various medicines I tried had no beneficial effect, until finally I was persuaded to try Dr. Williams' Pink Pills. I found these just what I needed, as after taking them a couple of months I not only gained in weight, but felt stronger, more cheerful and better in every way. I feel that I cannot praise these pills too highly for what they have done for me."

You can get Dr. Williams' Pink Pills through any dealer in medicine, or by mail, at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

How Far Can You See?
Details Cannot be Distinguished 600 Yards Away
When it comes to judging distances the average man is apt to go sadly astray.

Careful tests show that the following are distinguishable at 100 yards: The parts of the body, slight movements of the head, arms, or legs, and the details of dress.

Let the man stand another 100 yards away and his face becomes almost a blur, it being impossible to distinguish the features.

Let him stand 400 yards away and his face is a speck, but it is still possible to perceive movements of the legs or arms. When he is 600 yards away he is merely a form.

Best Of Reasons
"Why Germany did not send out her fleet to attack that of British when the latter was scattered all over the world in the early part of the war is explained in the second volume of the official history of German sea-war, now being published here," according to a Berlin dispatch. The answer to that is easy. It was because the British fleet fortunately, was not "scattered all over the world" at that time. Are the Germans still trying to fool themselves with such inventions as this regarding the war.—Buffalo Express.

Ladies Remove Their Corns In A Simple Way

No pain, no trouble, costs only a quarter. It is a very simple thing to paint on a small application of good old "Putnam's" night and morning. To remove corns, get entirely free from them, use Putnam's Corn & Wart Extractor. It is guaranteed 25c at all dealers. Refuse a substitute.

Wheat to Japan
That Western Canada will ship considerably more wheat to Japan the coming season than formerly, is the statement made by the director of a large Japanese grain firm at present visiting Alberta.

"COLD IN THE HEAD"

is an acute attack of Nasal Catarrh. These subject to frequent "colds in the head" will find that use of HALL'S CATARRH MEDICINE will build up the system and render them less liable to colds. Repeated attacks of Acute Catarrh may lead to Chronic Catarrh.
HALL'S CATARRH MEDICINE is taken internally and acts through the blood on the mucous surfaces of the system, thus reducing the inflammation and assisting Nature in restoring normal conditions.

Canadian Trade With Mexico
The Canadian Government will shortly appoint a trade commissioner and an assistant trade commissioner to report upon and investigate openings for Canadian trade in Mexico. The Order-in-Council containing the authority for the appointments says that "Mexico offers a field for organizing and extending healthy trade relations between that country and Canada."

Experimenter Blacklisted

Attempted to Cut Trees With Rapid Fire Gun

Felling trees at Castledock, Wash., with a red hot wire and a rapid fire gun to test some new inventions have placed Rudolph Mayer, the experimenter, on the forest service blacklist.

The wire not only burnt its way deep into a big red cedar trunk but also started a fire that quickly spread to adjoining pitchy timber.

The wire was carried to and from rapidly by an electric motor, the heat generated by friction being intended to sever the wood tissues quickly and smoothly.

Mayr's other idea was to aim a rapid fire gun into the trunk of a tree following turning the muzzle across the diameter. In the experiment the pointed bullets felled a two-foot tree but many passing through the trunk chipped large chunks off other trees and frightened the lumberjacks a long distance off.

A Remedy for Earache.—To have the earache is to endure torture. The ear is a delicate organ and few care to deal with it, considering it work for a doctor. Dr. Thomas' Electric Oil offers a simple remedy. A few drops upon a piece of lint or medicated cotton and placed in the ear will do much in relieving pain.

"Father, what is fate?"
"It's crossing the busy Main Street three time a day for three years, and then being run over by a farm wagon in the country."

The Many-Purpose Oil.—Both in the house and stable there are scores of uses for Dr. Thomas' Electric Oil. Use it for cuts, bruises, burns, scalds, the pain of rheumatism and sciatica, sore throat and chest. Horses are liable very largely to similar ailments and mishaps as afflict mankind, and are equally amenable to the healing influence of this fine old remedy which has made thousands of firm friends during the past fifty years.

Less Foreclosures
A considerable reduction in the number of foreclosures on Southern Alberta farms has resulted as a consequence of recent provincial legislation, it is stated.

More Automobiles in Japan

Despite the high tax—\$400 yearly on the cheapest car to \$1,500 on the higher class ones—despite bad roads and business depression, the use of automobiles is increasing rapidly in Japan. The increase has been particularly noticeable in cars which ply for hire in Tokio, Yokohama, and other cities, the charge for which is about \$4 an hour.

Stony Plain and District

Dances, Ducholke's Hall, Friday,
Sept. 1, Edmonton Orchestra.

Mr. McTaggart, from Victoria
B.C. was in this district, picking
up a carload of dairy cattle, this
week.

Mr. Geo A. Ware's lecture on
Sunday afternoon last, proved
very interesting.

Mr. and Mrs. Barth, Sr returned
to Stony, Monday, from a 30-
month's visit in Germany.

The week-end visitors to Stony
included Otto Wudel, Wetaskiwin,
J. D. Stulwert, Wabamun, Cecil
Umbach, Leduc.

The Atlas Lumber Co has been
awarded the contract for supply-
ing coal to the local school.

Those interested in the entries
for the big School Fair next
month, will find a full Prize List
on another page of this issue.

The White outfit, at Heather-
down, are hauling their lumber
to the new door factory.

The open season for auction
sales comes on Saturday next, the
26th, when Brox and Zucht will
dispose of Mr Schweitzer's hold-
ings, in town.

The attention of readers is di-
rected to the very excellent article
in "The U. F. A." by the Hon. J.
R. Brownlee on the subject, "Alta's
Mortgage Legislation." This should
prove of interest to, and should be
read by, all those with a "blanket"
on their farm.

The drought in B. C. this season
will compel some cattle men to
sacrifice half their stock, for lack
of moisture.

No men will be available from
B. C. this year for harvest work
on the prairies, owing to many
being engaged in fighting fires.

The South's One Good Year.

Members of the legislature from
Alberta constituencies, headed by
Hon. Geo. Hoadley, Minister of
Agriculture, and accompanied by
newspaper representatives and
others, spent three days last week
touring the grain fields and irri-
gation districts of Southern Al-
berta. During the trip, the party
saw magnificent crops on both dry
and irrigated land. The uniform
excellence of the crops throughout
the greater part of the south this
year impressed itself upon the
visitors.
